

Multi V-Belt Kit

Workshops which replace all wear parts of the belt drive system at the same time are always on the safe side. This is why Continental offers professionals its Multi V-Belt Kit as an allround repair solution, ensuring they have all the parts they need at hand. The kit contains a multi V-belt and - depending on vehicle application - all the required additional components such as tensioning and idler pulleys, tensioning dampers and fitting material.

The quality of the kit is demonstrated by its detail, for example by the grooved ball bearings of the tensioning pulley: Because of their high rating these long-life bearings have an extensive load capacity, while their increased lubrication volume ensures especially low-noise operation and reliability.

Contents

- > Multi V-belt
- > Tensioning and idler pulleys
- > Tensioning dampers
- > Fixing material
- > Hard-wearing change sticker

Benefits

- > Precise allocation to specific vehicles
- > Perfectly matched components
- > Original quality
- > 5-year guarantee:
