

Robust, precise, durable: steering components

Our steering components improve driving comfort and safety – while also making installation easier for mechanics. This is because all metal parts and threads are manufactured with absolute precision and ensure an excellent fit. Our wide product range offers automotive professionals the high-quality inner tie rods, track rod ends and steering boots needed for the most common repairs to vehicles in the European market, including the latest electric models. And all to Continental's customary high standards of quality and complete with a full five-year guarantee for registered workshops.

Benefits

- › **Precision:** excellent fit for all metal parts and threads
- › **Durability:** metal parts are hardened with a corrosion-resistant coating
- › **Robustness:** the materials are designed to withstand even the most extreme conditions
- › **Inseparability:** long-lasting rubber/metal bonds – one of our specialties for many decades now
- › **Ease of maintenance:** high-quality lubricants for reliable performance
- › **High quality:** uncompromising quality with five-year guarantee for registered workshops www.continental-ep.com/5
- › **Top service:** free installation instructions, technical hotline, assembly videos, etc.
