

OE Quality Belts **Built for the Import Market**

Smooth performance and maximum power transmission

Continental's Metric Program, specifically designed for import makes and models, was developed and is manufactured in Europe. The program provides **89%** coverage for European and Asian applications marketed in the U.S. and Canada.

- › **High tech synthetic rubber and high strength tension members allow for greater durability and increased flexibility**
- › **Engineered with OE expertise and innovation for the automotive aftermarket**
- › **The Program includes the Multi V-Belt Elast with Self-Tensioning Cord technology that ensures proper belt tension**
- › **SKUs with Multi V-Belt EXTRA are designed for start/stop systems and starter generator, including hybrid drives**
