DataDrive

Where Innovation and Opportunity Merge

DataDrive Market Intelligence System is the first system of its kind that puts critical market information right at your fingertips.

Driven by integrating over one billion vehicle, application and proprietary market data records, DataDrive is designed to give your business the competitive edge by helping you anticipate needs and prepare for future trends. By coupling market data from trusted resources with Continental algorithms, DataDrive will help improve these three categories of your business:

- › Inventory Optimization
- › Market Assessment and Profile Reports
- › Lead Generation

Your Continental Sales Representative can quickly access each of these key categories using DataDrive's easy-to-use dashboard web interface.

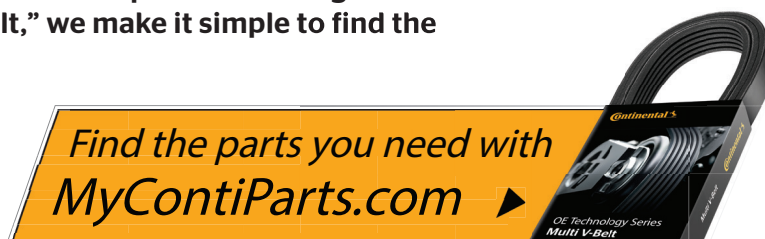

MyContiParts.com

The Fastest Way to Search for Aftermarket Parts

When you need parts, you want the search to be supercharged fast. With MyContiParts.com, it's quick and easy to find high-quality, technology driven automotive aftermarket replacement parts for a specific car or light truck. With more than 140 years under our "belt," we make it simple to find the right parts for the application.

Just log on and enter a vehicle's year, make, model, product type and engine. **MyContiParts.com** will instantaneously provide you with a list of Continental replacement components.

Or, by entering the Continental part number, **MyContiParts.com** will provide you with a list of applications for that specific part – helping you identify additional sales.

With **MyContiParts.com**, you can select the highest-quality automotive aftermarket replacement parts faster and install with confidence.
